

UKB NETWORK

RESEARCH SUPPORT

This group is a space where ideas, achievements, challenges, and concerns related to research support – across the full research cycle – can be openly shared. Our meetings feature open discussions on topics relevant to our academic community, occasionally enriched by an inspiring guest lecture. There is also dedicated time for networking among members. We identify and connect initiatives, fostering collaboration both within the group and beyond. We seek collaboration with organizations such as other UKB working groups, SURF, RINN, PUG, COS, LCRDM, ORCID-NL, and OpenScience NL.

WHO ARE WE?

Lieuwe Kool

Amsterdam UMC

Ane van der Leij

University of
Groningen

Alenka Prinčič

Leiden University

Ellen Fest

Wageningen University
& Research

Joeri Both

RESEARCH LIFECYCLE

TOPICS WE DISCUSS

- Open Science & Open Access – supporting researchers with open access publishing, mandates, policies, repositories, UKB publishing browser project and DURF project
- Research Data Management – data management support, FAIR storage, sharing, and archiving
- AI in research – responsible use of AI tools, AI literacy, implications for research integrity and publishing
- Research information systems – CRIS systems, researcher profiles, open research information, Barcelona Declaration, Broccoli project
- Scholarly publishing – preprints, predatory publishing, and publication culture
- Research impact & visibility – bibliometrics, altmetrics, responsible use of metrics, recognition & rewards
- Research integrity – plagiarism, data fabrication, retraction, and ethical publishing practices
- and all relations between the topics mentioned above
